

CASE STUDY

Client: **Autobarn LTD**

Location: **Northampton**

Product: **ATL Bay (Class 7) installation & 2**

Post Lift METHODS

V-Tech were delighted to install the complete ATL/MOT bay at Autobarn LTD. Autobarn is an independent BMW, Mini, Mercedes servicing and repairs centre. The V-Tech new ATL/MOT bay installation include, BM 4010 Brake Tester, Head Lamp Aligner, Gas Analyser, Smoke Meter, Jacking Beam and Radius Plates.

The lift is a European 4 Post, Electro Hydraulic model, featuring a 4 ton lifting capacity, built in Play Detectors and full safety features, including pressure safety valves and mechanical locking system. This is a very popular lift for MOT and ATL bay installations, hard wearing and reliable with an additional 2 ton manual jacking beam, the lift also comes with radius plates built into the runners next to the play detectors. Other features include a wired remote control which doubles as a flash-light for checking the underside of the vehicle.
